

Regarding: NAB's petition 04-160

I travel quite a bit and can't find any decent music stations, let alone traffic and weather. It gets old listening to CD's all the time. Now that I've gotten XM radio it is terrific. Having the advantage of getting the instant traffic and weather on the radio is also a MAJOR plus. I hope more cities jump on the bandwagon and join the XM system.

Don't get rid of the weather and traffic it's GREAT, especially for people on the road. Why would anyone think of getting rid of it anyway? It's informational to the listeners....if they choose to listen to it.

Sounds like this is some big political thing to me.
